

12th October 2021

Dear Parents/Carers

As you know from the information sent to you in recent weeks, the nasal flu immunization and coronavirus vaccinations are planned to take place at school on the 14th and 15th October.

This email is to kindly remind you to respond to the online permissions request as soon as possible.

Please note the following:

- You will need to give consent for the flu immunization if you wish for your child(ren) to receive this.
- You will need to give consent for the coronavirus vaccination if you wish for your child(ren) to receive this (Year 8/age 12 and above only).
- Separate consent can be given to the nasal flu immunization or the coronavirus vaccine. One can be administered without the other.
- Please complete the online forms to show if you want to refuse permission for either / both the flu immunisation or the coronavirus vaccination.
- If there is no indication of parental preference, then Gillick competency may be applied by the NHS vaccination team. Please discuss your intentions and wishes with your child so should this situation arise they are fully informed.

Kind regards

Mrs J Lucas
Deputy Headteacher

[Gillick competency – whether a child, under 16 years of age, is able to consent to their own medical treatment without the need for parental permission or knowledge.]
